90 Day Implementation Package for
SAP Extended Warehouse Management

DRAGONFLY
DIGITAL SUPPLY CHAIN EXPERTS

SWIFT-EWM Package

Overview

Dragonfly's Optimised SWIFT-EWM Package delivers pre-configured SAP Extended Warehouse Management (EWM) solutions tailored to meet diverse warehousing needs. Our package helps ensure a continuous supply of goods - despite fluctuating demands and market conditions while maintaining efficient inventory management.

Introducing our EWM Package

Ready-to-Use SAP EWM solutions

At Dragonfly, we provide tailored solutions for the supply chain, 3rd party logistics (3PL) and manufacturing industries. We understand that each of these industries faces unique warehousing challenges, and we believe that addressing these challenges is crucial for operational success.

Supply Chain

DRAGONFLY
DIGITAL SUPPLY CHAIN EXPERTS

Challenges:

- Ensuring *inventory accuracy* amidst fluctuating demand and the need for *real-time inventory visibility*.
- Maintaining accurate records to prevent stockouts and overstock situations.

SAP EWM Solutions:

- Provides advanced inventory management features that enable precise tracking of stock levels.
- Offers real-time tracking and comprehensive reporting tools to maintain up-to-date inventory records.
- Enhances inventory visibility, allowing for better demand forecasting and more efficient inventory management.

3PL

DRAGONFLY
DIGITAL SUPPLY CHAIN EXPERTS

Challenges:

- Managing the diverse needs of multiple clients while maintaining standardised processes.
- Providing customised solutions without compromising operational efficiency.
- Enhancing operational efficiency and client satisfaction.

SAP EWM Solutions:

- Offers highly customisable and configurable options that cater to specific requirements, ensuring that each client's unique needs are met.
- Integrates seamlessly with various systems, facilitating smooth operations and data flow.
- *Improves warehousing operation efficiency* through *advanced slotting and rearrangement* functionalities, storing fast-moving goods closer to exit areas, and suggesting optimal bin locations.
- Supports *automated warehouse operations, cross-docking functionality, and wave management*, enabling quicker access, streamlined processes, and efficient handling of large volumes of goods. This comprehensive approach significantly boosts overall productivity and operational effectiveness.

DIGITAL SUPPLY CHAIN EXPERTS

Manufacturing

Challenges:

- Balancing *just-in-time inventory* with production schedules to avoid overstocking while ensuring the availability of materials when needed.
- Ensuring the right materials are available at the right time to maintain smooth production flow.

SAP EWM Solutions:

- Supports *real-time inventory tracking*, providing up-to-the-minute data on stock levels.
- Facilitates automatic replenishment, ensuring that raw materials and finished goods are restocked as needed without manual intervention.
- Ensures that materials are available exactly when needed, optimizing production flow and reducing waste.
- Enhances the *efficiency of manufacturing processes* by integrating warehouse operations with production schedules, ensuring a seamless flow of materials and goods.

Dragonfly's Optimised 90 day EWM Package helps these industries streamline their warehouse operations, enhance accuracy, and improve overall efficiency, ultimately leading to better business outcomes.

Comprehensive Set of Functionalities

Dragonfly's Optimized EWM Package offers comprehensive pre-configured SAP Extended Warehouse Management (EWM) solutions tailored to address a wide range of warehousing needs. Our solution encompasses inbound, outbound, and internal warehouse processes, as well as seamless production integration. Key scope items include:

- ***1FS*** *Basic Warehouse Inbound Processing from Supplier:* Efficiently manage the receipt and processing of goods from suppliers, ensuring timely and accurate inventory updates.
- ***1FU*** *Initial Stock Upload for Warehouse:* Streamline the initial stock upload process, enabling accurate inventory setup and management from day one.
- ***1FW*** *Physical Inventory in Warehouse:* Conduct precise and efficient physical inventory counts to maintain inventory accuracy and integrity.
- ***1FY*** *Replenishment in Warehouse:* Automate replenishment processes to ensure optimal stock levels and prevent stockouts.
- 1G0 Scrapping in Warehouse: Manage the scrapping process effectively, ensuring proper disposal and accounting of obsolete or damaged inventory.

- 1G2 Basic Warehouse Outbound Processing to Customer: Facilitate smooth and accurate outbound processing to meet customer orders and enhance customer satisfaction.
- 1V5 Warehouse Inbound Processing from Supplier with Batch Management: Incorporate batch management in the inbound process to track and manage product batches for improved traceability and quality control.
- 1V7 Warehouse Outbound Processing to Customer with Batch Management: Utilize batch management in the outbound process to ensure accurate batch tracking and compliance with customer requirements.
- 1V9 Basic Warehouse Inbound Processing from Supplier with Quality Management: Integrate quality management into the inbound process to inspect and ensure the quality of received goods.
- 1VB Production Integration - Component Consumption and Receipt in Warehouse: Seamlessly integrate production processes with warehouse operations, managing the consumption and receipt of components for production.
- BGG SAP Fiori Analytical Apps for Inventory and Warehouse Management: Leverage advanced SAP Fiori analytical apps to gain real-time insights and analytics for inventory and warehouse management.

Additionally, our package includes the following deliverables:

- Comprehensive SAP EWM testing (Unit and Integration).
- Joint User Acceptance Testing (UAT) facilitation for user enablement.
- Assistance with data migration
- Super user training sessions
- Execution of cutover activities to ensure smooth transition to the new system.

RAPID 90 DAY DEPLOYMENT

DRAGONFLY
DIGITAL SUPPLY CHAIN EXPERTS

We offer rapid deployment within 90 days, following the SAP Activate methodology. This structured approach ensures that the Prepare, Explore, and Realise phases are completed within the 90-day package. During this period, we aim to finalise the solution for deployment, with the actual deployment and run phases scheduled based on business readiness.

- *Prepare and Explore Phases:* These phases will involve business workshops, including show and tell sessions, to deeply understand the business requirements and obtain sign-off on the EWM processes.
- *Realise Phase:* During this phase, we will perform configuration, unit testing, and integration testing to ensure the solution meets business needs. We will also facilitate User Acceptance Testing (UAT) and conduct super user training to empower key stakeholders.

This approach ensures that by the end of the 90-day period, the solution is ready for deployment, with thorough testing and user training completed. Dragonfly are committed to delivering a robust SAP EWM solution that aligns precisely with your business goals and operational requirements. We will also provide Hypercare support during the initial run phase to ensure a smooth transition and address any immediate post-deployment issues.
